

Selected estimator: 100 paired replications

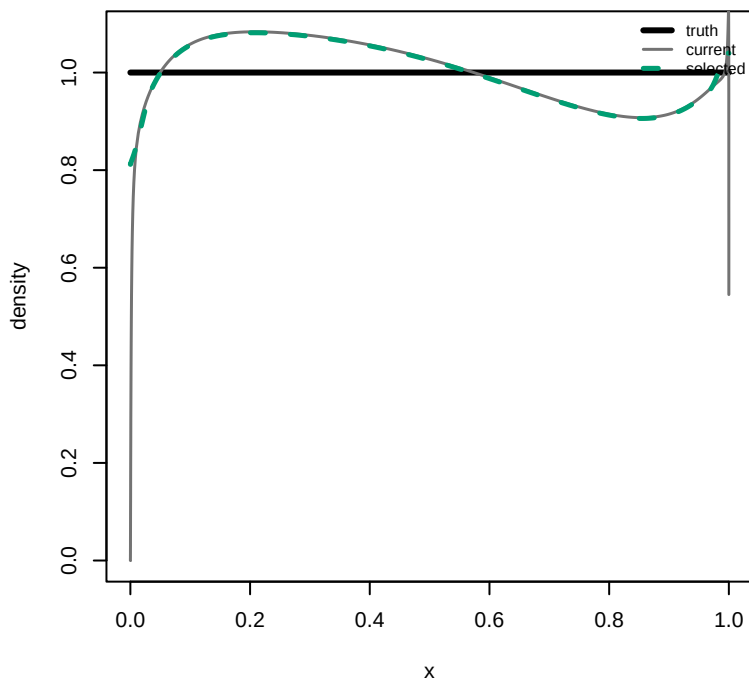

Effective endpoint components

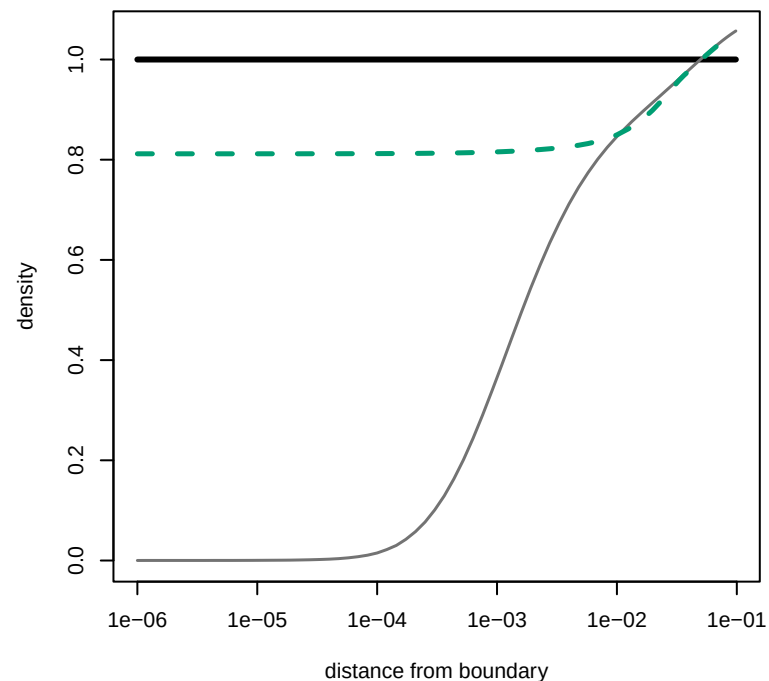

uniform, $n = 1000$; effective choices shown in panel titles

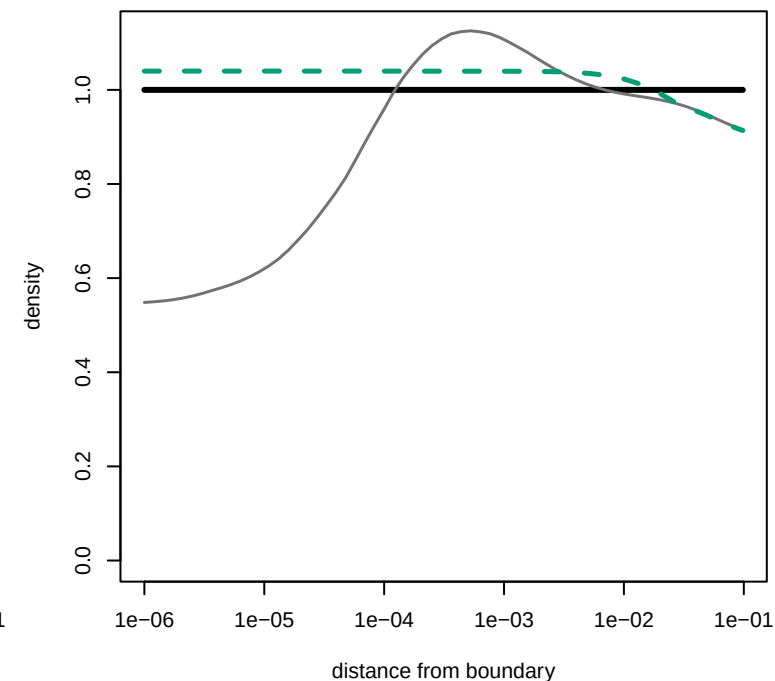

realization 1: L=finite, U=finite

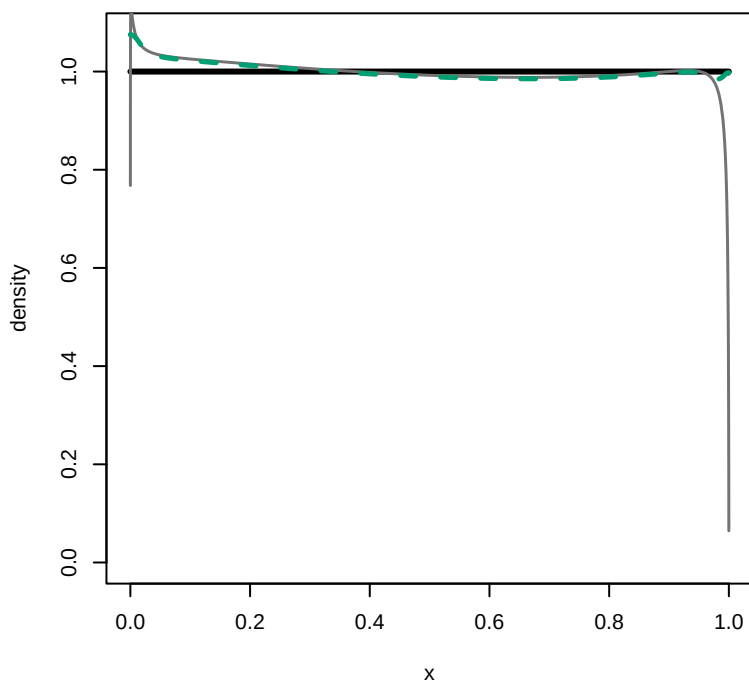

left

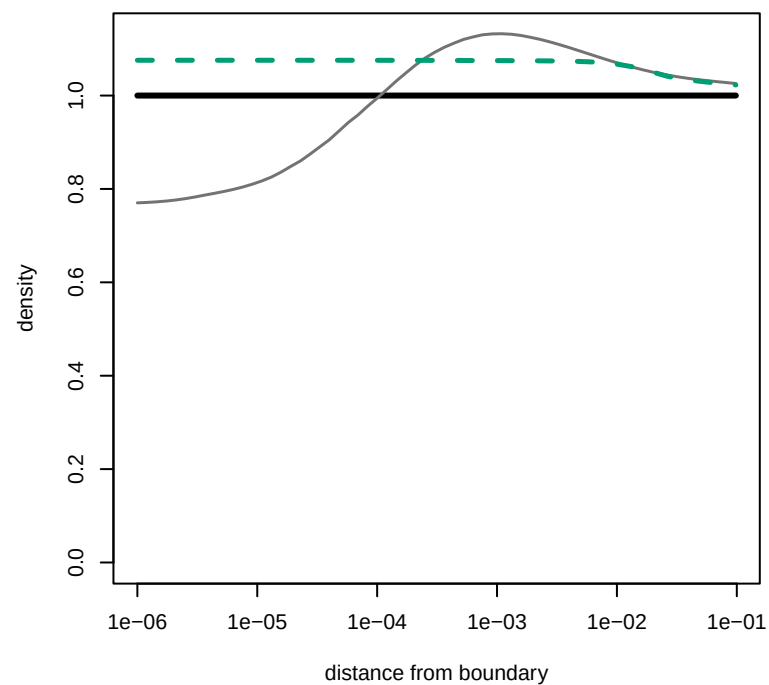

right

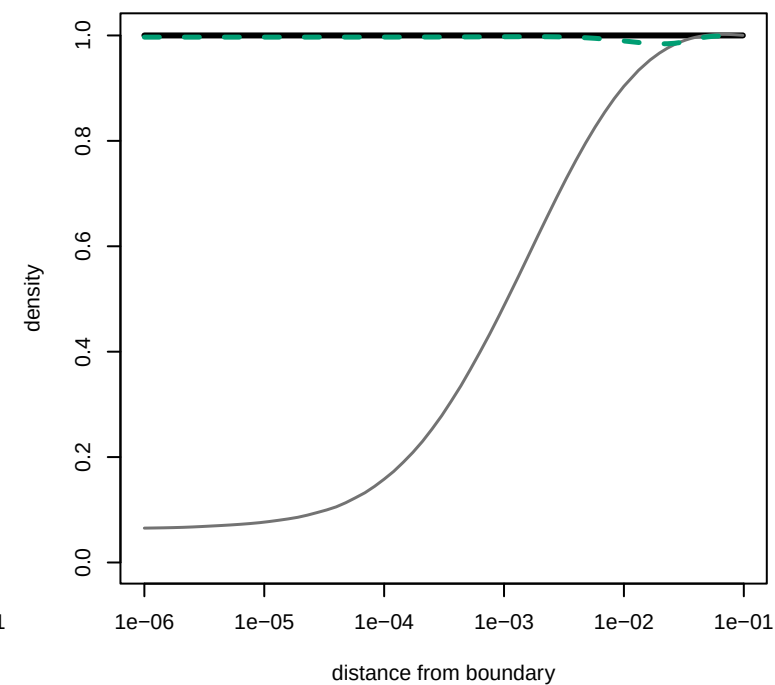

realization 2: L=finite, U=finite

left

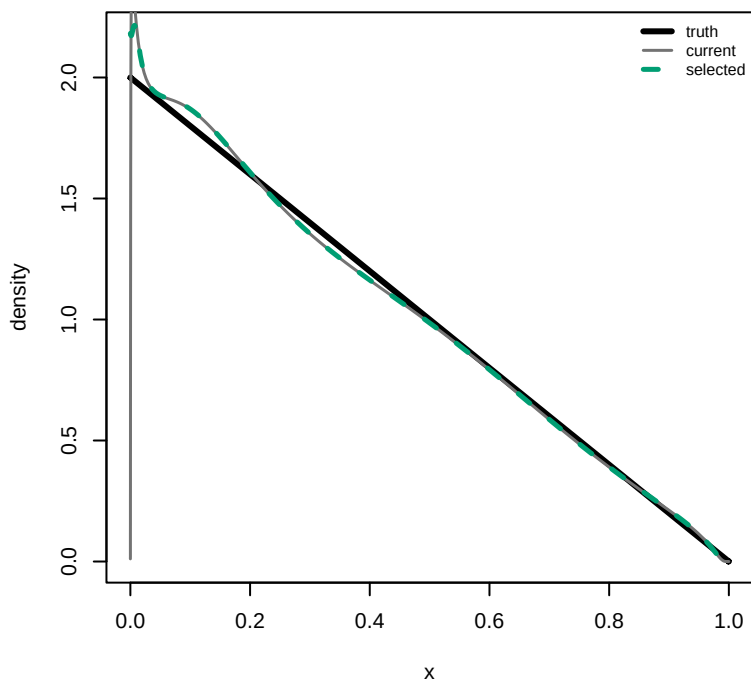

right

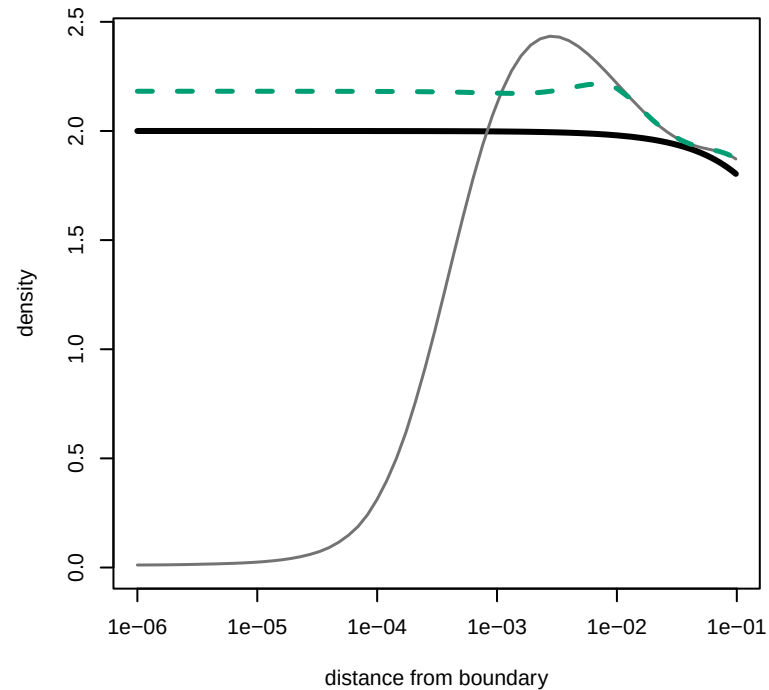

beta-1-2, n = 1000; effective choices shown in panel titles

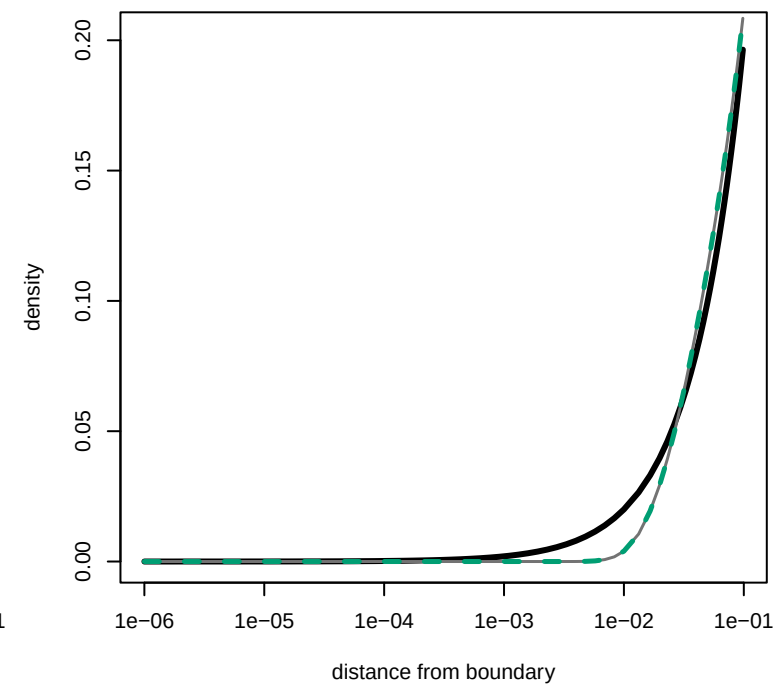

realization 1: L=finite, U=bulk

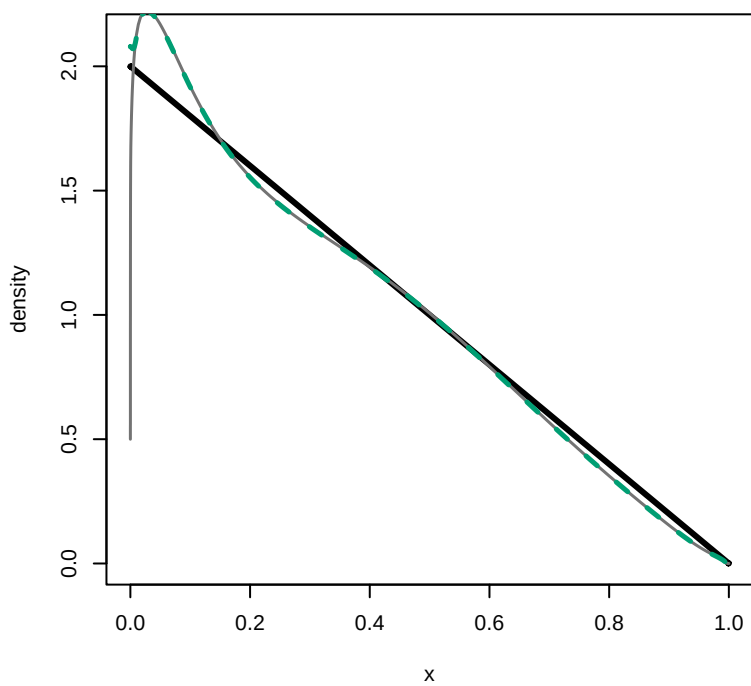

left

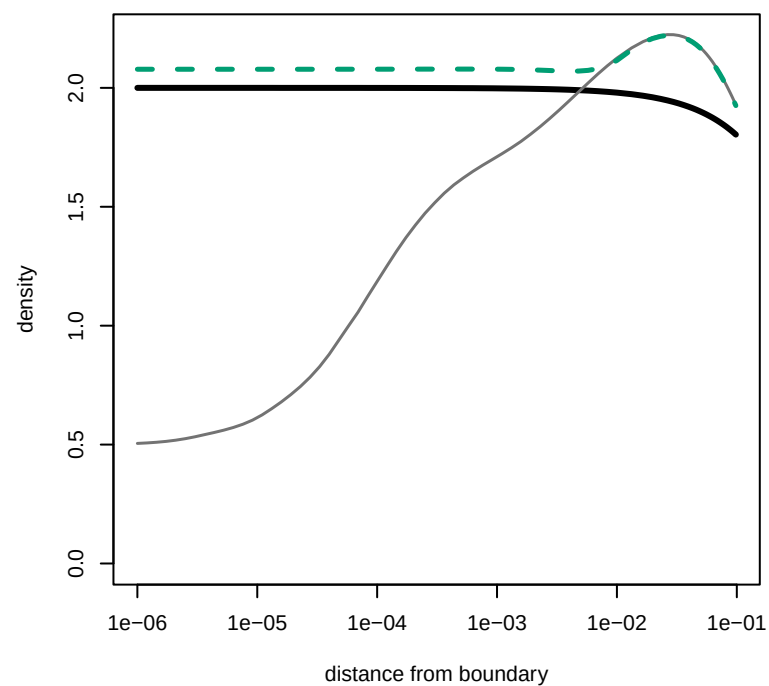

right

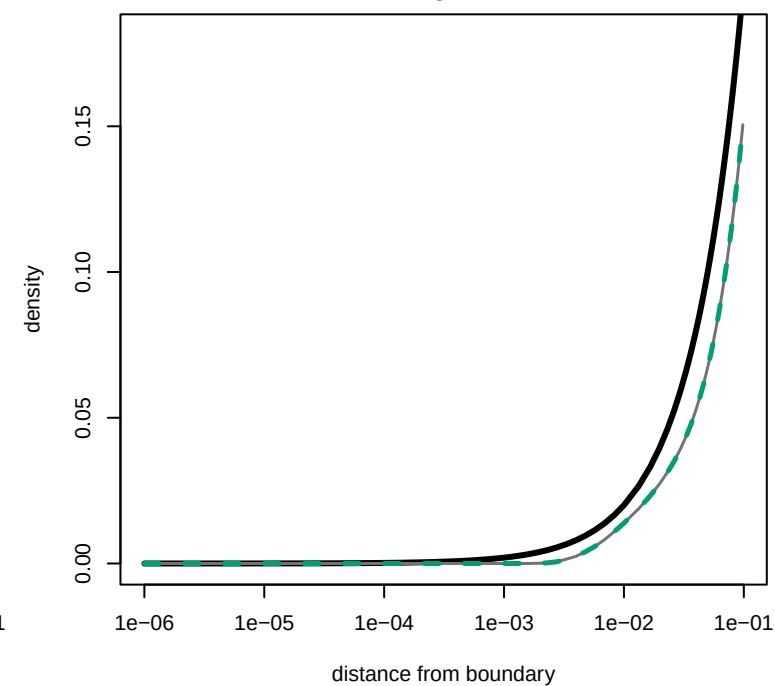

realization 2: L=finite, U=bulk

left

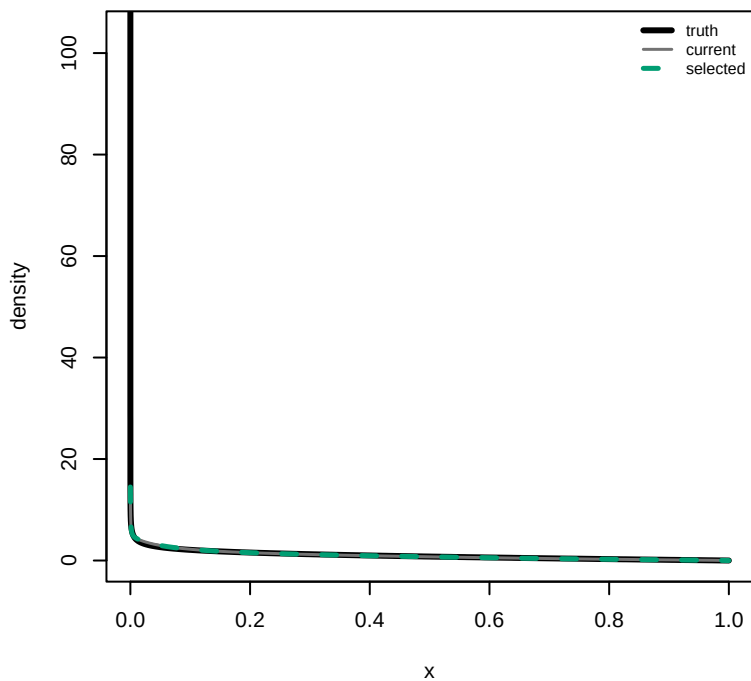

right

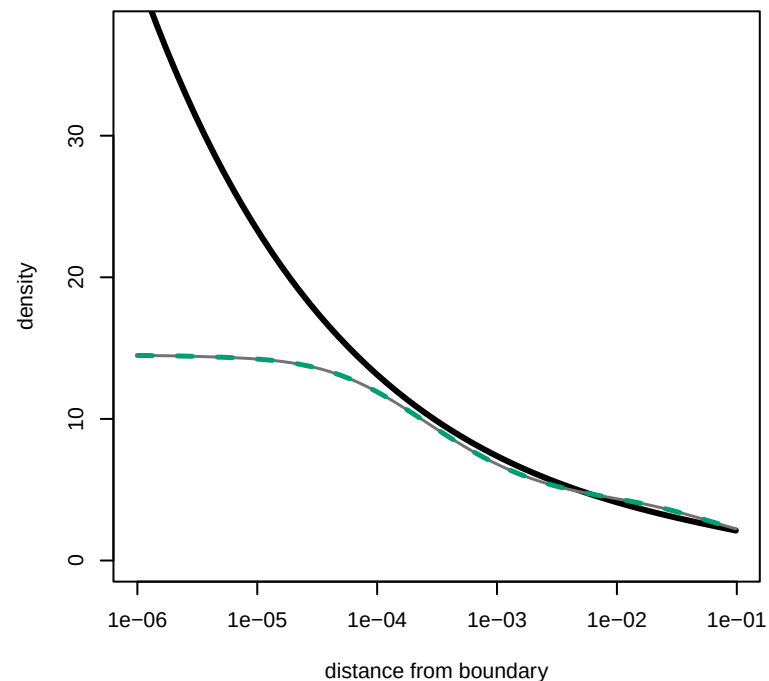

beta=0.75-2, n = 1000; effective choices shown in panel titles

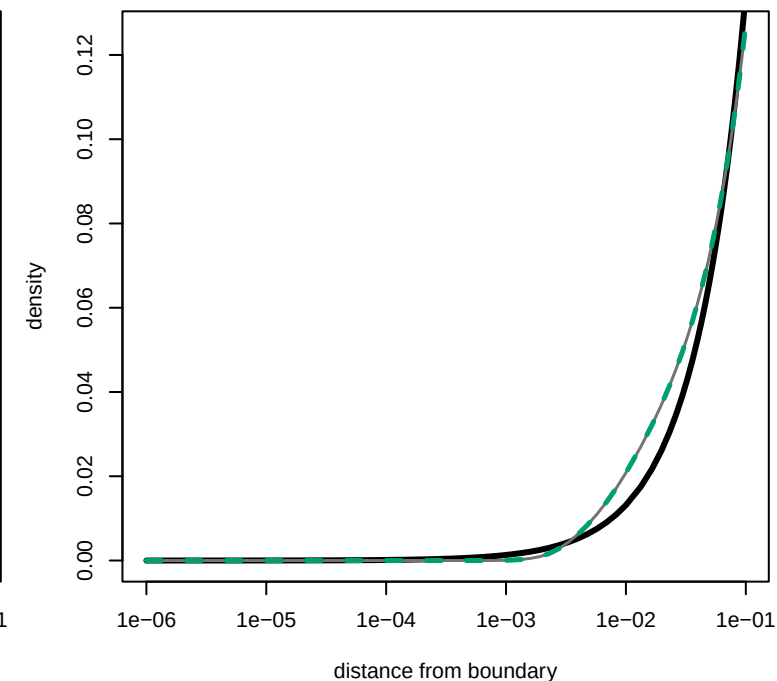

realization 1: L=bulk, U=bulk

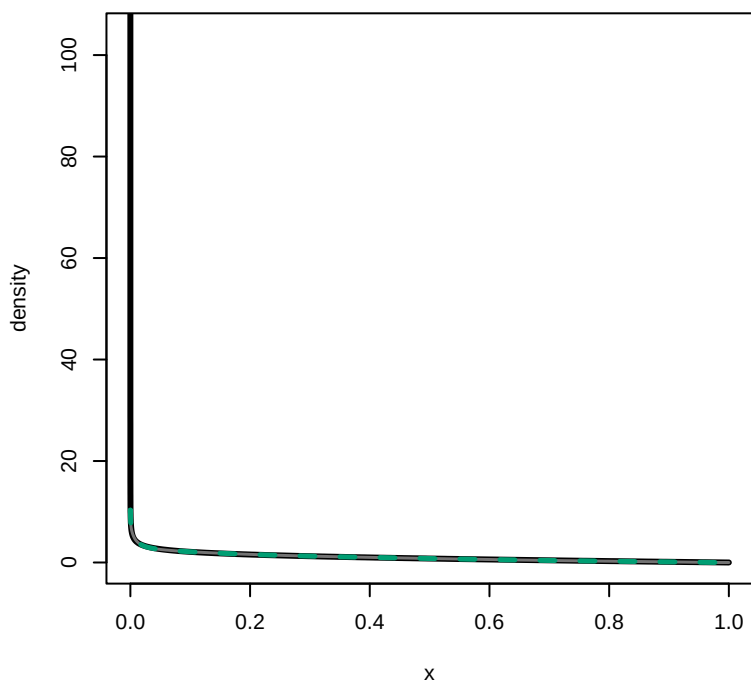

left

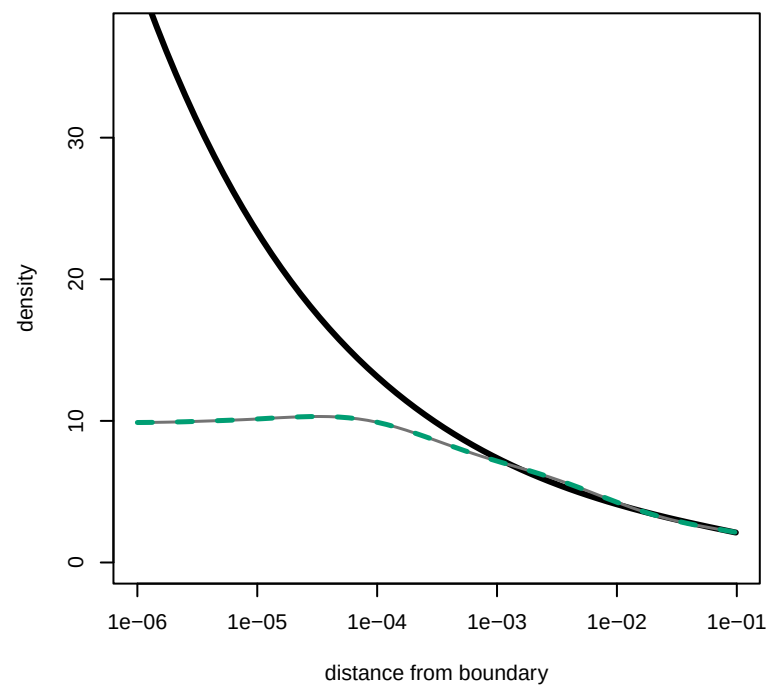

right

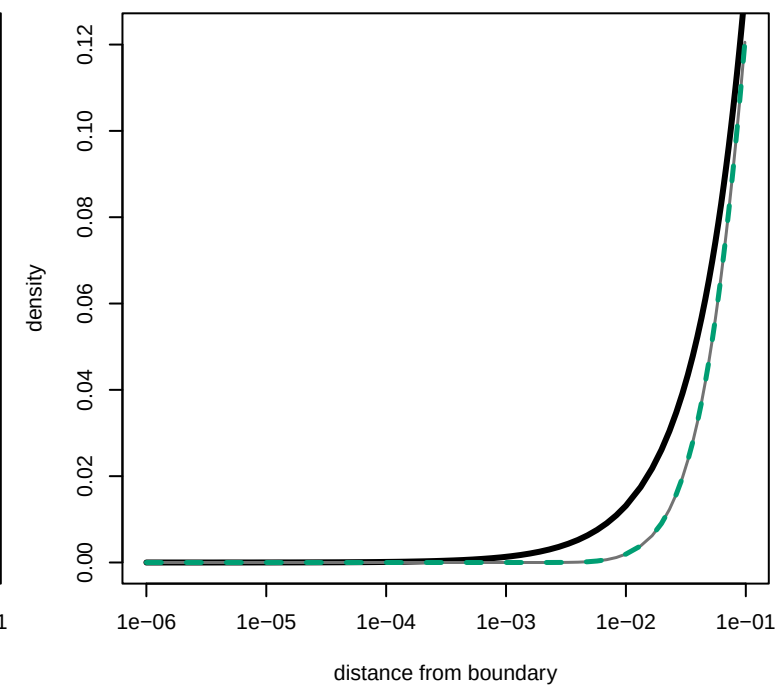

realization 2: L=bulk, U=bulk

left

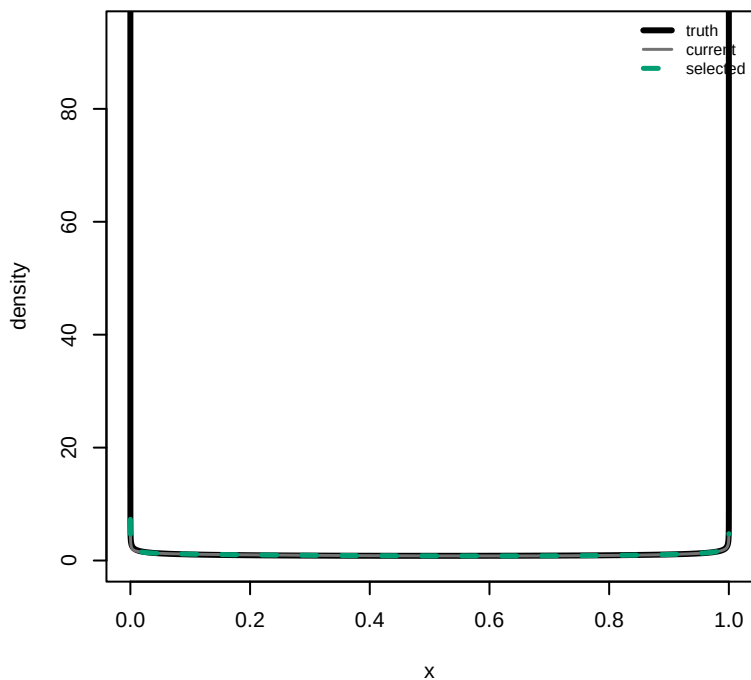

right

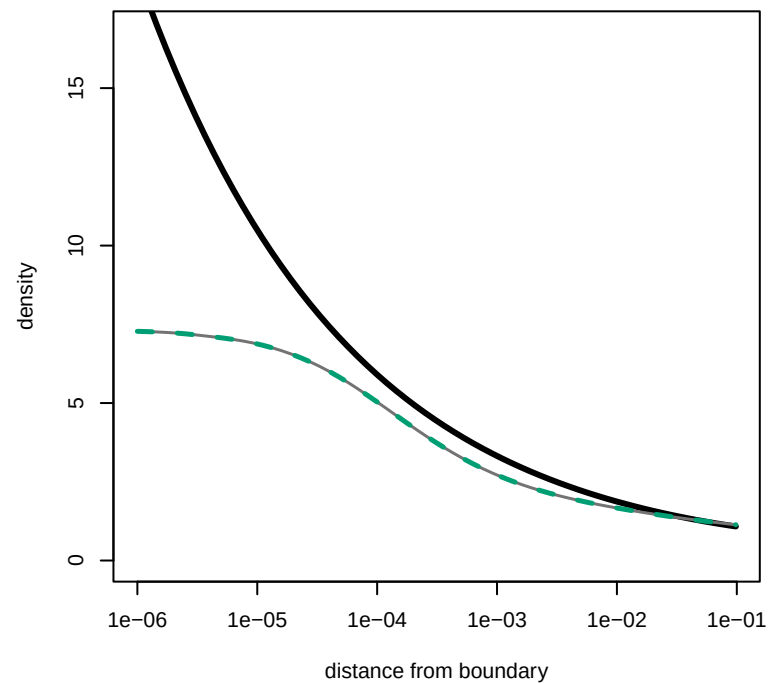

beta=0.75-0.75, n = 1000; effective choices shown in panel titles

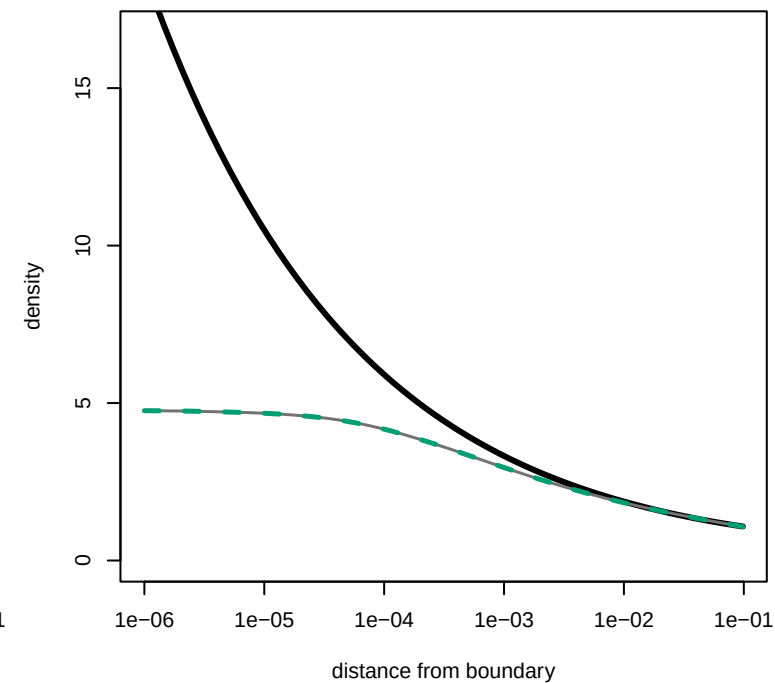

realization 1: L=bulk, U=bulk

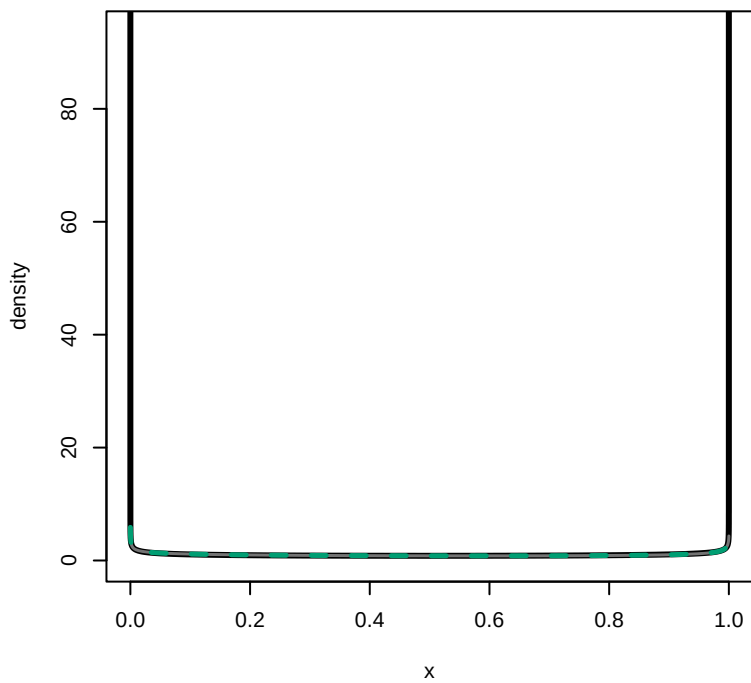

left

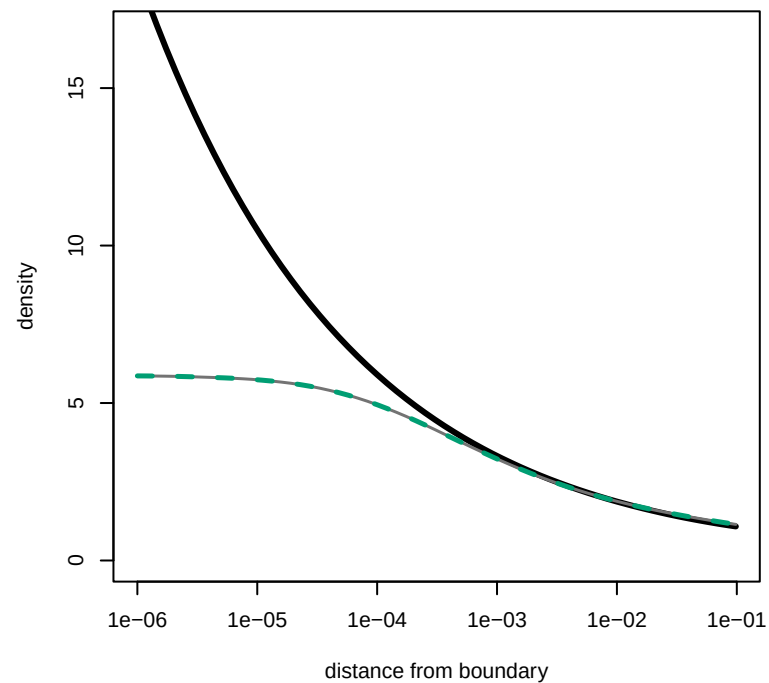

right

realization 2: L=bulk, U=bulk

left

right
